I am a web programmer, since 2008 I began to see much potential in computers and I decided to learn how computers works, from that point the first thing that I did was use Linux os as my primary Os, that blew up my brain. few months later I entered at university and learned about software development, IT concepts, and many technologies. My university life was great, but sometimes, that classes weren't enough for me. I pass much hours front of a computer instead see people, I consider when you love what you do the time is just a word and simply flowing among us.

https://www.facebook.com/Mac-Systems-Group-SCRLta-168661576491011/

Team menber of software development department.

- First steps in real projects.

VOLUNTEER

Couch at Startup Weekend
September 2014 - September 2014

Startup Weekends are weekend-long, hands-on experiences where entrepreneurs and aspiring entrepreneurs can find out if startup ideas are viable. On average, half of Startup Weekend's attendees have technical or design backgrounds, the other half have business backgrounds. Beginning with open mic pitches on Friday, attendees bring their best ideas and inspire others to join their team. Over Saturday and Sunday teams focus on customer development, validating their ideas, practicing LEAN Startup Methodologies and building a minimal viable product. On Sunday evening teams demo their prototypes and receive valuable feedback from a panel of experts.

http://www.up.co/communities/peru/ica/startup-weekend/3763

Teacher at hack Space
June 2015 - June 2015

Teach techniques for web development, we practiced much javascript.

https://www.facebook.com/media/set/?set=a.1010950065581848.1073741857.854008687942654&type=3

Speaker at FLISOL 2013
May 2013 - May 2013

I talked about mongo db and no-sql databases above all

https://www.facebook.com/flisolLambayeque/photos/a.550858391631871.1073741826.176772925707088/550867084964335/?type=3&theater
